Porto, PT

SUMMARY

A dedicated Full-Stack Software Developer passionate about learning, problem solving and attention to detail. I've recently graduated from a full-time 6-month intensive bootcamp and am eager to contribute to your team.

PROFESSIONAL EXPERIENCE

Software Development Trainee

Boolean UK

07/2024 - 08/2024 Remote

- Worked on two team simulations with legacy codebases
- Developed Front end applications, using React and JavaScript
- Built Back end applications, using RESTful APIs, PostgreSQL and Node.js
- Learned about Git workflow
- Undertook Scrum Master role, using agile methods

PROJECTS

Portfolio

leonardolodi.vercel.app

My personal website that showcases my skills and projects.

Omniloq

omniloq-frontend.vercel.app

A password manager which saves every login into the database with its password encrypted.

- Built a full-stack app in 2 weeks as a solo project
- Technologies used: **JavaScript, React, Node.js, Express, PostgreSQL, Prisma ORM, Crypto.js, JWT, Browser Router and CSS**
- Developed diagrams, such as: ERD, Component Tree and the interface's design
- Applied Browser Router to navigate UI
- Used JWT for authentication
- Built the encryption and decryption methods with Crypto.js
- Deployed the front end repository on Vercel and the back end on Render

Banking System

github.com/LeonardoSaraceli/ood-bank-challenge

A bank management that simulates deposits, withdrawals and prints out the bank statement between dates.

- Built a Front end app in 2 days as a solo project
- Technologies used: **JavaScript, React, Jasmine, Browser Router and CSS**
- Developed the Front end interface using React and CSS
- Built the Back end based on OOP methodology using JavaScript
- Practiced TDD and implemented automated tests with Jasmine

SKILLS
